

JAGRUTHI PASUMARTHI

+91 8125113797 plaj931@gmail.com Dammapeta, India

Professional Summary

Results-driven Software Engineer and April 2026 graduate with a B.Tech in Computer Science (Data Science & Big Data Analytics) and BBA in Finance from KL University. Experienced in designing and building scalable, full-stack services using Java, Spring Boot, MERN Stack, and SQL, with a strong foundation in microservices architecture, REST API development, database management, and DevOps workflows. Demonstrated ability to deliver reliable, performance-oriented applications through CI/CD practices, Git-based version control, and test-driven development. AWS Certified Cloud Practitioner with additional certifications in ServiceNow and RedHat, reflecting a commitment to operational excellence in cloud-enabled environments. Eager to contribute to Microsoft Azure Data's mission of building the data platform for the age of AI by driving reliability, scalability, and service health for mission-critical workloads.

Education

KL University

B.Tech – Computer Science (Data Science & Big Data Analytics) — BBA – Finance

Dammapeta, India

April 2026

Sri Chaitanya Junior College

Intermediate – Mathematics, Physics, Chemistry

2020 – 2022

Sai Spurthi D.A.V School

CBSE – PCBM

2019 – 2020

Technical Skills

Programming Languages: Java, JavaScript, Python (Pandas, NumPy), SQL, C, HTML, CSS

Backend & Microservices: Spring Boot, JPA, Hibernate, Node.js, Express.js, REST API Design, Microservices Architecture

Frontend: React JS, Axios, Bootstrap

Databases: SQL (Relational – Structured Query, Indexing, Joins), MongoDB (NoSQL), Database Design & Lifecycle Management

Cloud & DevOps: AWS (Certified Cloud Practitioner), Linux, Git, CI/CD Pipelines, Agile/Scrum, DevOps Workflows

Observability & Reliability: KPI Tracking, API Telemetry, Service Health Monitoring, Automation Workflows

Platforms & Tools: ServiceNow (System Admin & App Development), RedHat Enterprise App Dev, Excel (Pivot Tables, Data Analysis)

Certifications

AWS Certified Cloud Practitioner – Amazon Web Services

ServiceNow Certified System Administrator & Certified Application Developer

RedHat Certified Enterprise Resource Application Developer

Internship Experience

AICTE – Java Full Stack Virtual Internship

Software Development Intern

2023 – 2024

- Designed and developed end-to-end, scalable services using Java Full Stack technologies including Spring Boot, JPA, Hibernate, and React JS, directly mirroring patterns used in cloud-based microservice platforms.
- Improved service reliability and performance by strengthening backend logic, RESTful API design, and frontend-backend integration across iterative development cycles.
- Leveraged Git-based version control and CI/CD-aligned workflows to collaborate on incremental feature delivery, improving developer productivity and code quality.
- Applied test automation principles and agile practices to validate functional correctness, contributing to operational excellence and incident prevention across the application lifecycle.

Projects

ERP Analytics Platform | *Java, Spring Boot, JPA, Hibernate, React JS, JavaScript, SQL*

- Designed and built a full-stack, scalable ERP analytics service featuring modular backend microservices, relational database management, and a responsive React frontend – reflecting Azure SQL DB’s capacity allocation and placement architecture.
- Implemented telemetry-driven KPI dashboards to monitor and track service health metrics in real time, improving observability and enabling data-driven decision-making across business workflows.
- Engineered REST API endpoints with structured request-response contracts, ensuring resilient communication between platform components and enabling seamless cross-functional integrations.
- Applied CI/CD-ready modular design, separating concerns across service layers to support independent deployment, automated testing, and operational excellence.

Airline Reservation System | *MERN Stack: MongoDB, Express.js, React JS, Node.js*

- Built a mission-critical, full-stack reservation platform managing end-to-end booking lifecycle – from placement and allocation to cancellation – using scalable NoSQL (MongoDB) and RESTful microservice design.
- Developed and operated backend services in Node.js/Express with robust API integration, enabling real-time data availability and high service reliability under concurrent workloads.
- Automated booking state transitions and lifecycle management, demonstrating experience with capacity management workflows directly applicable to Azure SQL DB workload orchestration.
- Continuously improved developer productivity by adopting reusable component frameworks, modular routing logic, and structured error handling across the service stack.

Airport Management System | *ServiceNow Developer Instances, Automation Workflows*

- Developed a cloud-hosted airport operations management platform on ServiceNow, building automated workflows for resource allocation, incident tracking, and operational dashboards.
- Leveraged ServiceNow’s platform primitives to implement end-to-end service management flows, emphasizing automation, incident prevention, and availability – core reliability engineering principles.
- Applied DevOps workflows and platform-level tooling to improve developer productivity and reduce manual intervention across service operations.

Competitive & Corporate Experience

Accenture Innovation Challenge 2023

Participant – Cyber Crimes & Security Track

- Collaborated cross-functionally to analyze a real-world Cyber Crimes & Security problem statement, designing analytical solutions that demonstrated structured engineering thinking and customer-centric problem solving.
- Practiced presenting technical solutions to evaluators, building skills in communicating complex ideas across audiences – critical for partner collaboration in cross-functional Azure Data teams.

Hackathon – Code for Cause v2.0

Participant

- Delivered a functional web application under time-constrained, high-pressure conditions using HTML, CSS, and Git-based version control, demonstrating rapid development, agile teamwork, and DevOps-oriented collaboration skills.

Additional Experience

Social Internship – Agriculture & Rural Development

Volunteer Intern

- Worked within diverse, cross-functional teams to deliver community development outcomes, building strong adaptability, stakeholder communication, and collaborative problem-solving skills that translate directly to Microsoft’s inclusive team culture.
